Backfilled generation interval **ESTIMATED**

Inverter outage on meter SYN-HOS-M-0080001, Mar 8 09:00 – Mar 9 16:30. The 31.5-hour gap was backfilled from the prior 14-day clear-sky generation profile and added to the metered total. Superseded if an actual read is recovered.

PPA ID	METER ID	SYSTEM SIZE	RATE SCHEDULE
SYN-HOS-P-0000001	SYN-HOS-M-0080001	285 kW DC	HOS-PPA-2024
BILLING PERIOD	PPA ENERGY RATE	NET-METERING CREDIT	ANNUAL ESCALATOR
Mar 1 – 31, 2025	\$0.119 / kWh	\$0.092 / kWh	2.0 %

GENERATION & EXPORT

DESCRIPTION	BASIS	QUANTITY	UNIT
Metered solar generation	Actual read	38,210	kWh
Backfilled gap (Mar 8–9 outage) <i>Estimated • 31.5 h</i>	<i>Estimated</i>	<i>+2,140</i>	<i>kWh</i>
Adjusted solar generated	Billed basis	40,350	kWh
Energy exported to grid	Actual read	5,980	kWh

CHARGES THIS CYCLE

PPA energy charge 40,350 kWh (adjusted) × \$0.119	\$4,801.65
Net-metering export credit 5,980 kWh × \$0.092	-\$550.16
Total amount due	\$4,251.49

Charge is computed on the adjusted generated total including the backfilled interval. A corrected statement is issued if the outage interval is later recovered as an actual read.

ENVIRONMENTAL SUMMARY

RECs issued	40
Avoided CO ₂ e	8.43 t

REC count reflects adjusted generation. RECs tied to the backfilled interval are provisional pending an actual read.
