USAGE PROFILE

Daily steam output (klb)

CAMPUS PLANT INPUT SUMMARY – INFORMATIONAL

Steam serving the Student Center is produced at the Northlake Thermal Plant from purchased electric and natural-gas inputs. Figures below summarize plant input attributable to this allocation and are informational only — not separately billed.

Electric input (purchased)	38,400 kwh
Natural-gas input (purchased)	4,820 therms

This statement allocates Northlake Thermal Plant operating costs to campus cost centers on an internal cost-recovery basis. Amounts shown are inter-departmental transfers within Northlake University — not charges payable to an external utility. Allocations derive from metered ton-hours, peak chilled-water demand, and metered steam, plus each center’s share of fixed plant operations and maintenance.
