Northlake University — EEM Portal Branding

DATE October 1, 2026
PREPARED BY Northlake University

Branding assets and templates for the **Northlake University Energy Portal** (EEM Suite). Everything here is brand chrome + imagery — no message logic was changed. Synthetic / fictional.

Start here: open `Brand Assets.dc.html` for a visual index of everything, or `Login Mockup.dc.html` for the full login page.

Brand basics

Deep navy (primary)	`#1F3A5F`
Warm gold (accent)	`#C9A227`
Slate gray	`#5B6573`
Canvas / page bg	`#F5F6F8`
Typeface	Open Sans

Mark. A gold north-star above a leaf-shaped lake (the leaf doubles as the lake surface; the midrib is the waterline) inside a navy roundel — "Northlake" plus a sustainability cue. It harmonizes with the existing Northlake University ecosystem mark and stays legible down to 16px.

Files

```
documents/brand/
|- Brand Assets.dc.html          Visual index of all assets (open this)
|- Login Mockup.dc.html          Full branded EEM login page
|- eem-portal-brand-kit.pdf      This guide
|- eem-application-branding.pdf  The branding Northlake asked for
|- login-customization.pdf       Ready-to-transcribe CustomLoginInfo values
|- animations/                   Login and loading animations (animations-guide.pdf)
|- images/custom/                ← upload these to EEM's images/custom/
|  |- northlake-logo.svg                 Master lockup, navy + gold (vector)
|  |- northlake-logo-reversed.svg        Master lockup, reversed / white (vector)
|  |- northlake-mark.svg                 Symbol only (vector)
|  |- northlake-mark-reversed.svg        Symbol only, reversed (vector)
|  |- LoginLogoRight.png                 Login hero / right panel  (800×600)
|  |- northlake-header-logo.png          Header logo, positive     (200×48, transparent)
|  |- northlake-header-logo-reversed.png Header logo, reversed     (200×48, transparent)
|  |- northlake-email-logo.png           Email header logo, white  (148×38, transparent)
|  |- northlake-email-logo@2x.png        Email header logo @2x     (296×76, transparent)
|  |- favicon-32.png                     Favicon                   (32×32)
|  |- app-icon-192.png  app-icon-512.png PWA / app icons
|  `- site.webmanifest                   Manifest, theme #1F3A5F
|- email-templates/              ← mirrors EEM's shared-layout structure
|  |- _Layout.html                       Shared wrapper (navy header, gold bar, footer)
|  |- Account/
|  |  |- PasswordReset.html / .subject.txt / .txt
|  |  |- VerifyEmail.html  / .subject.txt / .txt
|  |  `- EmailChanged.html / .subject.txt / .txt
|  `- Workflow/
|     `- Default.html      / .subject.txt / .txt
`- previews/                     Rendered email samples (preview only — do NOT upload)
```

Login customization

All filled `CustomLoginInfo` values (kicker, title + underline, description, laptop caption, 4 bullets, header/background colors, "Need help?" footer with 3 contacts, sustainability CTA) are in `login-customization.pdf`, formatted to transcribe straight into the EEM admin screen. `Login Mockup.dc.html` shows them assembled.

> **One thing to check:** `HeaderBackGroundColor` is navy (`#1F3A5F`). The default `northlake-header-logo.png` is built to read on a **light** header, so on a navy header set `HeaderRightLogoUrl` to `northlake-header-logo-reversed.png` (shipped in the same folder). Details in `login-customization.pdf`.

Email templates — brand only, tokens preserved

The structure mirrors EEM: a shared `_Layout.html` wrapper + per-email body fragments injected at `{{Body}}`. Only the brand chrome changed — navy `#1F3A5F` header, **gold** `#C9A227` accent bar / eyebrow / button (replacing the default orange/red), the reversed Northlake email logo, the top-right label "Northlake University Energy Portal", and the co-branded footer. Mobile media queries and table-based, client-safe HTML are intact.

Tokens used per template (none renamed, removed, or restyled):

Template	Tokens
`_Layout.html`	`{{Subject}}` `{{Preheader}}` `{{LogoUrl}}` `{{LogoRedirectUrl}}` `{{Body}}` `{{CurrentYear}}` `{{MachineName}}`
`Account/PasswordReset`	`{{ResetUrl}}` `{{ExpiresIn}}`
`Account/VerifyEmail`	`{{VerifyUrl}}` * · `{{ExpiresIn}}`
`Account/EmailChanged`	`{{NewEmail}}` * · `{{LogoRedirectUrl}}`
`Workflow/Default`	`{{Subject}}` · `{{Message}}` * · `{{LogoRedirectUrl}}`

* The brief only specified `PasswordReset`'s tokens (`{{ResetUrl}}`, `{{ExpiresIn}}`). The starred names follow EEM conventions but are **best-guess placeholders** — please confirm them against your original VerifyEmail / EmailChanged / Workflow templates and rename to match if they differ. The brand chrome won't change either way.

`{{LogoUrl}}` should resolve to `northlake-email-logo.png`; `{{LogoRedirectUrl}}` to `https://energy.northlake.example.edu` (per the spec).

Notes

- **Fonts in SVG.** The vector wordmarks are outlined (no live text), so they render identically in `<img>` tags, favicons and email clients without Open Sans being installed. Regenerate them with `python generators/outline_brand_lockups.py`.
- **PNGs** are flattened with the wordmark baked in, so they need no font.
- `previews/` holds fully-assembled email samples (sample token values) used by the Brand Assets page — they are for review only, not for upload to EEM.
