Agreement Sheet — Helios Onsite Solar (Power Purchase Agreement)

DATE October 1, 2026
PREPARED BY Northlake University

Provided by: Northlake University Finance + Sustainability. Synthetic/illustrative values for setup. Helios Onsite Solar is a **third-party developer** that owns rooftop and carport photovoltaic arrays on our properties and sells the output under a **Power Purchase Agreement (PPA)**. Billing is **per kWh generated**, not per kWh consumed, and there is no demand charge. Generation offsets our Valley Electric load; surplus is exported for a net-metering credit.

Agreement: Solar Power Purchase Agreement (HOS-PPA-2024)

Effective Jan 1, 2024 – Dec 31, 2025

Item	Basis	Value
PPA energy	per kWh generated	$0.119
Annual escalator	per year	2.0%
Net-metering credit	per kWh exported	$0.092
Renewable energy certificates (RECs)	ownership	**Northlake retains**

The monthly PPA invoice = PPA energy charge − net-metering credit. Helios also issues a monthly REC and avoided-emissions statement (informational; no charge).

Arrays (one PPA agreement each): Science Center, Student Center, and the solar carport at Cedar Row Carport and Grounds.

Notes for setup:

- Generation is **positive-generation / negative-load** — it reduces our net Valley Electric usage on shared buildings.
- Output follows the daily solar shape, peaks midday, near zero overnight.
- One inverter outage leaves a generation gap that is later backfilled.
- We **retain the RECs** for market-based emissions reporting (see Sustainability Requirements) — please reflect this in environmental accounting.
- **Open:** confirm which solar attributes Northlake retains under the PPA.
