Rate Tariff Sheet — Valley Electric District (Electric)

DATE October 1, 2026
PREPARED BY Northlake University

Provided by: Northlake University Finance. Synthetic/illustrative values for setup. Provider: Valley Electric District (VED), municipal electric distribution.

Schedule: Time-of-Use General Service (VED-TOU-GS)

Applies to our general-service electric accounts (listed in the notes below). Demand is billed on the highest 15-minute average kW in the period. Power factor below 0.95 on lab-heavy buildings can add a reactive-power adjustment.

Effective Jan 1, 2024 – Dec 31, 2024 (FY2024)

Charge	Basis	Rate
Energy — On-Peak	per kWh (summer Jun–Sep, weekday afternoons)	$0.241
Energy — Part-Peak	per kWh	$0.168
Energy — Off-Peak	per kWh	$0.112
Demand	per kW (max 15-min)	$18.40
Facility charge	per month	$64.00
Power factor adjustment	when PF < 0.95	as applicable
Public purpose program	rider	as applicable
Utility users tax	% of charges	as applicable

Effective Jan 1, 2025 – Dec 31, 2025 (FY2025 rate change, VED-TOU-GS-FY25)

Charge	Basis	Rate
Energy — On-Peak	per kWh	$0.258
Energy — Part-Peak	per kWh	$0.179
Energy — Off-Peak	per kWh	$0.118
Demand	per kW (max 15-min)	$19.75
Facility charge	per month	$67.50

Seasons: Summer = June–September (on/part/off-peak periods). Winter = remaining months (part/off-peak only; no on-peak).

Schedule: Time-of-Use Primary Service (VED-TOU-PRI)

Primary-voltage service for the chiller plant at the Central Plant. Same seasons and periods as VED-TOU-GS; demand is billed on the highest 15-minute average kW in the period.

Effective Jan 1, 2024 – Dec 31, 2025

Charge	Basis	Rate
Energy — On-Peak	per kWh (summer Jun–Sep only)	$0.214
Energy — Part-Peak	per kWh	$0.149
Energy — Off-Peak	per kWh	$0.098
Demand	per kW (max 15-min)	$21.90
Facility charge	per month	$410.00

Account on this schedule: Central Plant (Northlake Thermal Plant), meter Central Plant Electric Service.

Schedule: Unmetered Area Lighting (VED-AL-1)

Unmetered flat-rate lighting service for our outdoor areas; the bill carries a fixture charge and no usage.

Effective Jan 1, 2024 – Dec 31, 2025

Charge	Basis	Rate
Fixture charge	per fixture per month	$14.60

Accounts on this schedule: Campus Grounds (Campus Grounds Area Lighting, 48 fixtures) and Cedar Row Carport and Grounds (Cedar Row Parking Lighting, 20 fixtures).

Schedule: Generator Interconnection Service (VED-GEN-IC)

Our Ridgeline Wind Site connects to Valley Electric at its substation at 34.5 kV. One revenue meter records both directions in 15-minute intervals: **received** is the farm's export, **delivered** is station service drawn while the turbines are idle, and reactive energy is recorded for the power-factor charge. The meter multiplier is 12,000 (300:1 potential transformers, 200:5 current transformers). The bill states export in **MWh**.

Effective Jul 1, 2024 – Dec 31, 2025

Charge	Basis	Rate
Generator customer charge	per month	$285.00
Station service energy	per kWh delivered	$0.131
Reactive power	per kVArh beyond power factor 0.95	$0.0042
Generation credit	per kWh received (export)	−$0.0612

Account on this schedule: Ridgeline Substation (Northlake Thermal Plant), account SYN-VED-A-0010014, meter Ridgeline Interconnection Meter. Valley Electric opened it on July 1, 2024, when the plant bought Ridgeline Wind; the seller's account was SYN-VED-A-0019014. It reads with our other accounts on the 5th, so its first bill

ran from the opening read to August 4 (35 days).

Rider: Renewable Generation Bill Credit Transfer (VED-BCT)

The generation credit is not kept on the generator account. Each month the whole credit moves to one benefiting account, the Central Plant's primary service, where it reduces that bill.

Effective Jul 1, 2024 – Dec 31, 2025

Charge	Basis	Rate
Credit transfer	the generator account's generation credit	100%
Administrative fee	per benefiting account per month	$12.50

Generating account SYN-VED-A-0010014 (Ridgeline Substation); benefiting account SYN-VED-A-0010013 (Central Plant). Each credit lands one billing cycle later: the generator account's first bill (July 1 to August 4, 2024) is credited on the Central Plant's bill for August 5 to September 4. The same dollars appear on both bills, as a transfer out on the generator bill and as a credit received on the Central Plant bill; count them once.

Notes for setup:

- We would also like two analysis-only electric rates modeled: a **real-time / index price option** (priced on an hourly market price) and a **large-demand ratchet** rate (billed demand floored at a percentage of the prior peak) for the Science Center.
- Accounts on VED-TOU-GS: Admin Hall, Science Center, Library, Student Center, Lakeview Residence Hall, Recreation and Aquatics Center, Parking Structure, Cedar Row A, Cedar Row B and Cedar Row Common House. Cedar Row A and B are each billed on one building master meter; apartment and house loads are on our own submeters behind it, and VED never bills a resident.
