March generation on the Science Center array, with an estimated interval. The inverter on meter SYN-HOS-M-0080001 was out from March 8 at 09:00 to March 9 at 16:30 (31.5 hours); Helios backfilled the gap at 2,140 kWh from the prior 14-day clear-sky generation profile and added it to the 38,210 kWh metered, so 40,350 kWh is billed. If the interval is later recovered as an actual read, a corrected statement supersedes this one; the 40 RECs issued are provisional on the backfilled interval.
