Design Brief — Render the Northlake Intake Package

PREPARED BY Energy Hippo implementation team

Paste the block below into Claude (with document-generation / design capability), attaching or pointing it at the Markdown sources listed. It turns the package into polished, corporate-looking deliverables. Reusable: edit the "Produce" list to choose which documents to render.

You are producing a polished **customer onboarding / implementation intake package** for an energy-and-utility management software engagement. The customer is **Northlake University** (fictional). I'll give you Markdown source files; render them as professional documents that look like Northlake's Facilities, Finance, Housing, and Sustainability teams assembled and sent them to their software vendor.

Important: the content is **synthetic/fictional**. Use the values exactly as written — do not invent real companies, people, addresses, or numbers. Keep a small "Synthetic — Packet 0.4" marker on each document.

Source files

All under: `documents/intake-package/`

- `00-cover-letter.md` — transmittal letter
- `01-discovery-questionnaire.md` — completed discovery questionnaire
- `northlake-facilities-and-utility-overview.md` — facilities & utility overview
- `facilities-and-meter-register.md` — building, account, meter and measured-point register (the same inventory as the workbook)
- `rate-tariff-sheets/valley-electric-district.md`
- `rate-tariff-sheets/sierra-gas-utility.md`
- `rate-tariff-sheets/river-city-utilities.md`
- `rate-tariff-sheets/northlake-thermal-plant.md`
- `rate-tariff-sheets/helios-onsite-solar.md`
- `chart-of-accounts-and-gl-guide.md`
- `user-access-request.md`
- `tenant-and-lease-roster.md`
- `sustainability-requirements.md`
- `source-system-inventory.md`
- `data-collection-workbook-additions.md` — later-phase requirements already included in the workbook

Existing workbook to extend (do not recreate from scratch):
`documents/intake-package/data-collection-workbook.xlsx`

This is the single customer workbook. Preserve its existing tabs and reuse the source-system and tenant/lease tabs; do not generate separate inventory workbooks.

Produce

#	Document	From	Format
1	Cover / transmittal letter	00-cover-letter.md	PDF (on letterhead)
2	Discovery Questionnaire	01-discovery-questionnaire.md	PDF
3	Facilities & Utility Overview	northlake-facilities-and-utility-overview.md	PDF (cover page + TOC)
4	Rate Tariff Sheets (6)	rate-tariff-sheets/*.md	one PDF each, utility-rate-sheet style
5	Chart of Accounts & GL Coding Guide	chart-of-accounts-and-gl-guide.md	PDF
6	User Access Request & Role Matrix	user-access-request.md	PDF
7	Tenant & Lease Roster	tenant-and-lease-roster.md	Tenants & Leases tab in Data Collection (+ optional PDF summary)
8	Sustainability Reporting Requirements	sustainability-requirements.md	PDF
9	Source System Inventory	source-system-inventory.md	Data Sources and Source Measurements tabs in Data Collection (+ optional PDF)
10	Data Collection Workbook	the existing .xlsx and its versioned sources	One Excel workbook with 26 tabs (21 generated plus 5 retained later-phase tabs), including Hierarchy, Contacts, Departments & Responsibilities, Service Profiles and Units and Submeters
11	Combined Intake Package	all of the above	one bundled PDF "binder" with a cover page + table of contents

Brand & styling

- **Identity:** Northlake University — collegiate, professional. Palette: deep navy primary, slate gray, a warm gold accent. A simple "NORTHLAKE UNIVERSITY" wordmark with a small lake/leaf mark is fine (placeholder logo OK).
- **Letterhead / header:** university wordmark + "Facilities · Housing · Sustainability · Finance," with a header on each page: **Northlake University — <Document Title> — Packet 0.4**.
- **Footer:** page X of Y + "Synthetic, fictional data — prepared for implementation setup."
- **Cover pages** on the overview and the combined binder (title, "Onboarding Data Package," coverage period Jan 1 2024 – Dec 31 2025, Packet 0.4).
- **Tariff sheets:** style like real utility rate sheets — provider name as the issuer, effective-date banners, clean rate tables — presented as enclosures Finance compiled.
- **Tables:** consistent styling, zebra rows, bold headers; keep all tables from the Markdown.
- **Voice:** customer/operational language (property, site, building, cost center, utility account, meter, measured point). Don't add software/implementation jargon.

Output

Write the rendered files to `documents/intake-package/`, named clearly (e.g. `01-northlake-cover-letter.pdf`, `northlake-intake-package.pdf`); the workbook stays at `documents/intake-package/data-collection-workbook.xlsx`. Preserve all content from the sources; you are formatting and packaging, not rewriting.
