Facilities & Utility Data Packet

How Northlake organizes properties, utility services, meters, measured points, billing relationships, and operational data sources — as customer-owned facilities information.

PREPARED BY

Facilities, Housing,
Sustainability & Finance

PACKET VERSION

Draft 0.1

COVERAGE PERIOD

Jan 1, 2024 – Dec 31,
2025

PURPOSE

This packet describes how Northlake organizes properties, utility services, meters, measured points, billing relationships, and operational data sources. It is written as customer-owned facilities information, not as a software-system export.

HOW TO USE THIS PACKET

Facilities, Housing, Finance, Sustainability, and vendor contacts should review the narrative, then complete or correct the accompanying inventory workbook. Unknown fields should be marked TBD rather than guessed.

01 Organization & Sites

Facilities Operations

Campus utilities, central plant, BMS coordination, meter maintenance, and vendor access.

Housing Operations

Cedar Row Apartments operations, tenant-facing utility questions, and common-area services.

Finance & Accounts Payable

Utility account ownership, invoice payment, account changes, and billing contacts.

Sustainability Office

Reporting, renewable energy accounting, emissions factors, and performance tracking.

SITES

SITE	DESCRIPTION	PRIMARY OWNER
Northlake Main Campus	Academic, administrative, dining, events, central plant, and solar assets.	Facilities Operations
Cedar Row Apartments	Student housing buildings with common-area utilities and solar carport.	Housing Operations

02 Utility Services

Valley Electric District ELECTRIC

External electric service with monthly bills, time-of-use energy, billing demand, and selected interval demand data.

Sierra Gas Utility GAS

External natural gas service with monthly therm billing for heating and food-service loads.

River City Utilities WATER

Municipal water, sewer, and stormwater service. Water is metered; sewer and stormwater may be derived or fee-based.

Northlake Thermal Plant STEAM · CHILLED

University-owned central plant with chilled-water and steam allocations by cost center.

Helios Onsite Solar SOLAR PPA

Third-party solar PPA with generated energy, exported energy, REC, and avoided-emissions statements.

03 Meters & Measured Points

Meters identify the physical or logical measurement device. Measured points identify the streams that device or data source produces.

- Electric delivered kWh and billing demand kW
- Natural gas therms and delivered ccf metadata
- Potable water kgal, derived sewer kgal, and stormwater ERUs
- Chilled water ton-hours and tons
- Steam klb
- Solar generated kWh, exported kWh, and generated kW
- Weather and building sensor values such as temperature, humidity, and wind speed

04 Data Sources

SOURCE CATEGORY	DESCRIPTION
Utility billing files	External provider invoices, bundled municipal statements, internal allocation extracts, and PPA invoices.
Interval meter files	Electric, solar, and other interval data supplied by provider or meter-data systems.
Building systems	AcquiSuite, BACnet, Modbus, Spinwave, FIG-family files, and SQL historian extracts.
Weather sources	NOAA current observations and Aeris observations or forecasts.
Handheld routes	Neptune water uploads, MVRs gas uploads, and handheld meter reading event files.

05 Known Events to Disclose

Library electric meter replacement during August 2024

Student Center gas estimated bill followed by corrected bill

Student Center electric missing interval block requiring backfill

River City Utilities duplicate bundled billing file

Cedar Row A municipal account number change at renewal

Valley Electric District rate schedule change beginning January 2025

One negative-test utility file with unsupported units, excluded from normal loads

06 Open Items for Northlake

- ☐ Confirm final building ownership and operating contacts.
- ☐ Confirm billing contact names and email aliases.
- ☐ Confirm whether stormwater applies to Cedar Row buildings.
- ☐ Confirm central plant allocation rules for steam-only buildings.
- ☐ Confirm preferred weather station for each property.
- ☐ Confirm which solar attributes are retained by Northlake under the PPA.
- ☐ Confirm data source owners and delivery cadence for each source system.

ACCOMPANYING WORKBOOK

The inventory workbook provides structured tabs for organization units, sites, buildings, utility services, accounts, meters, measured points, data sources, known events, contacts, and open items. It is intended to be reviewed and corrected by Northlake teams.
