

Northlake Billing Account Setup

PREPARED BY Energy Hippo implementation team

Packet 0.3 | Issued 2026-09-14 | Enter on the Billing Account editor

Every billing account carries more than its number and provider. This lists the rest of the editor for each account: where its bills arrive from, whether it reaches AP or the GL, which invoice template it prints with, and its default GL accounts. The service address, remit address and account representative are in the facilities and meter register.

The GL accounts and the validation overrides need their Phase 3 prerequisites in place: the chart of accounts must exist before an account can point at one, and the global validation tests before an account can override one.

Account setup

What to enter on the Billing Account editor beyond the account's own identity. Entry type records how the bills arrive, service type whether the account reaches AP, GL, both or neither.

Account Number	Account / Agreement	Company	Bill Entry Type	Bill Service Type	Bill Invoice Template	Default AP Account	Default Expense Account	Bill Validation Tests
SYN-VED-A-0010001	Admin Hall / VED	Northlake University	Bill Importer	AP and GL	Energy Hippo Default Template	2000-AP	5100-ELEC	Inherits company

Bill validation overrides

Bill validation tests set at account scope. Every other account inherits its company, and the company inherits Global.

Account Number	Account / Agreement	Test	Setting	Threshold	Why
SYN-VED-A-0010002	Science Center / VED	cost_change_pct	On	60%	lab and exhaust loads swing far past the 35% campus threshold
SYN-SGU-A-0020004	Student Center / SGU	usage_change_pct	Off		the estimated read and its corrected actual are a deliberate swing
SYN-RCU-A-0030003	Cedar Row A / RCU	period_length	Off		the July 2024 account renewal produces one short period
SYN-NTP-C-0000001	Science Center / NTP	cost_max	On	\$250,000	an internal allocation never approaches the global ceiling
